

INTRODUCTION

For fifty years, Yorkshire Precision Gauges has specialised in the design and manufacture of high quality precision gauges – a vital element in the quest for consistent manufacturing accuracy, and a secure basis for inspection procedures.

Today we offer an extensive range of metrology gauging products that are manufactured to meet your gauging needs.

QUALITY

Quality is assured. Our metrology laboratory is UKAS approved and our BS EN ISO 9001 : 2000 computerised quality assurance system links the production, inspection and commercial departments. Gauges comply with British Standards as required by our customers and work to tolerances of less than 0.001 mm or, for reference gauges, to 0.00001 mm.

SERVICE

Service is paramount. To support customers ranging from small workshops to some of the world's largest multi-nationals we provide the finest delivery service in Europe.

For urgent requirements our Express Service provides for speedier processing of your order from receipt right through to despatch from our works. (Only on selected product ranges)
